

Sunshade Blind Systems are the latest innovation in stylish shading and solar control solutions.

Sealed glass units incorporating integral blinds are the perfect glazing option for a wide range of situations where an unobtrusive blind is needed. Sunshade Blind Systems are ideal for use in conservatories and invaluable in commercial premises or any settings where low maintenance and hygiene are priorities.

Choose from either a Venetian or Pleated blind totally enclosed inside the cavity of high performance insulating glass sealed units, making them dust, allergy, & maintenance free. With over 15 colours to choose from and delivered within 4 weeks from order, Sunshade Blind Systems offer all the benefits of blinds without any cleaning and maintenance chores.

INTEGRATED BLIND SYSTEMS

THE PERFECT SHADING SOLUTION

Within domestic environments Sunshade Blind Systems are the perfect choice for garden rooms, conservatories and multi-folding doors. They do not interfere with the operation of the windows and are easily colour coordinated to provide a seamless elegant finish. The blinds are opened, closed and tilted using innovative but simple rotational magnets. Therefore the units are kept hermetically sealed, are easy to use and virtually impossible to break.

Also highly effective for use in residential, medical, educational and commercial buildings

they provide a flexible and energy efficient solution to managing a building's environment. Ideal for hospital wards, classrooms and public areas such as receptions, bars and restaurants, they provide particular benefits for sensitive areas such as computer and research laboratories.

For the designer, blinds are both a creative and practical solution adding elegance and style while at the same time offering discreet privacy and a safe and low maintenance answer to providing an effective control of light and heat.
