H High Speed

Benefits

- Manually operated for precise control
- Blinds can be raised or lowered to suit the weather conditions
- Blinds can be tilted to regulate precisely the level of light and heat entering the home
- Unbeatable protection against glare and build - up of heat
- Cannot get dirty or dusty
- Slats cannot be damaged
- Provides complete privacy
- Can be combined with a range of toughened / high performance glasses
- Choice of 9 coloured slats / 8 pleated fabrics (see colour charts)

Operation

Manual operation with continuous cord loop Motorised - with remote control on request

Applications

- Suitable for all vertical window applications
- Ideal for conservatories, kitchens and bathrooms as well as folding / sliding door systems

Features

width (mm) height (mm)
 300 - 1.000 300 - 2.000
 4 mm internal glass only
 Sizes outside above dimensions available on request

Solar shading properties

A double glazing unit with an integrated ScreenLine® blind is an excellent screen against solar radiation and offers the possibility to quickly and easily adjust the internal environmental lighting level. Due to the glass transparency, the use of normal double glazing units is often not enough to guarantee correct control of solar energy.

A ScreenLine® integrated system, on the contrary, filters the light transmission and affects its value by the tilting of the slats (in case of venetian blinds) or by lowering the blind (in case of pleated blinds). The heat and visual comfort are improved according to the various seasons.
