ght through to installation.

new look home

We are the first choice for customers throughout the area. Our reputation for quality, service and price means that much of our work comes from recommendations.

Congratulations! You have made the first step in buying a new door or a conservatory for your home. And what a great decision it will be for you and your family... improved security, reduced noise and virtually no maintenance - not forgetting the fact that these are just a few of the ways you will benefit from our products. With our energy efficient windows, your home will benefit from reduced energy costs by reducing the amount of energy you use to heat your home. This will help you to reduce the amount of greenhouse gas emissions from your home.

We have a choice of two VEKA window profile styles for you to choose from, sculptured and bevelled profiles. Both offer superb security features, high energy efficiency and an attractive hand crafted finish. Available in a range of colours and finishes and a selection of colour matched handles, letterplates, numerals, knockers and spyholes - you can tailor your frames to match your home perfectly - whatever the period.

Sculptured

Sculptured windows are distinguished by softer, rounded lines.

Bevelled

Angular lines give bevelled windows a clean, modern look.

Our windows and doors are available in a wide range of woodgrain and coloured finishes to perfectly complement your property.

Authentic woodgrain effect

Woodgrain foils give the look and effect of grained timber without the hassle involved in the maintenance. Foiled finishes are far more resilient against scratching than painted or sprayed finishes and also comes with a 10 year colour fast guarantee.

Our standard range of 18 foiled finishes in that true wood effect, with the option of mixing internal and external foils for truly personal appearance should cover all of your needs, or you could just choose white woodgrain.

Key features

We have taken the time to choose the best profile available on the market. Our windows and doors meet and exceed latest industry standards, giving you the peace of mind to know that you are buying quality - BSI approved quality.

- Choice of rounded (sculptured) or angular (bevelled) frames
- Range of energy ratings available from A+ - C
- The 1st ever A-rated window was made from VEKA profile
- Wide choice of colours and woodgrain finishes available

You choose the match it! We have available. Please information.

Green House?

... can help!

It's easy to be green....

People today are far more aware of the methods and means of reducing their impact on the environment when compared to just a few years ago. This in tandem with ever increasing energy prices has led homeowners to make improvements to their properties which benefit the environment. Loft and cavity wall insulation, solar panels and energy efficient windows and doors are the main areas of 'green' investment.

When you look at the infra-red images below, it is easy to see why more and more people are choosing to replace timber and even 1st generation PVC-U windows with the more energy efficient frames that are available today. It's such a simple way to save money and do your bit for the planet too.

... show where

Our products give you....

Smaller energy bills

Replacing all single-glazed windows with A-rated double glazing could save you £££'s each year on your energy bills

A smaller carbon footprint

By using less fuel, you'll generate less of the carbon dioxide that leads to global warming - typically, 680kg a year.

A more comfortable home

Energy-efficient glazing reduces heat loss through windows and means fewer draughts and cold spots.

Peace and quiet

As well as keeping the heat in, new energy efficient windows insulate your home against outside noise.

Reduced condensation

Energy-efficient glazing reduces condensation build-up on the inside of windows.

Nothing but the best energy rated frames....

We have dedicated significant time and money in developing a range of energy efficient products, all of which are capable of achieving the highest Window Energy Rating (WER) values.

PLUS they're low, low maintenance

the functional benefits and performance of a modern PVC-U window with the feel, aesthetic appeal and operational simplicity of a traditional style window.

Our vertical slider windows have a timeless elegance made with beautiful proportions and symmetry. They have the true looks of the original timber sash window, retaining all of the character of the property itself.

The modern vertical slider not only emulates the aesthetics of its traditional timber equivalent, but also offers additional benefits such as the easy maintenance of PVC-U. We also offer the option of run-through sash horns and a 105mm deep bottom rail for a truly authentic look. (Ask us for further details).

Bi-Folding Doors

Where an opening or partition is required between rooms, whether a small or large room, or where your home leads onto a patio or outside area and you want to extend your view of the garden, the bi-folding door is ideal for these applications. Bi-folding doors create synergy between rooms of all shapes and sizes to seamlessly connect your living space. These doors can either open inwards or outwards to optimise the space you have available.

Obscurity Levels

Level 2 - Minster

Level 3 - Chantilly

We take your security very seriously

Frame security

In an ideal world... you would be able to leave your back door unlocked or maybe even drop a key behind the milk bottles - but sadly this is not the case. Home burglaries and break-ins are commonplace. The financial cost is often significant, and the emotional cost - beyond measure. Fortunately, our windows and doors are equipped with the necessary hardware to keep you and your possessions safe.

● Hinge protectors

Mounted on the sash and frame of the window/door, hinge protectors are an optional measure to enhance security and work by interlocking when closed and help prevent forced entry.

● Shoot-bolts

When the window handle is turned to operate the lock, the shoot-bolts 'mushroom cams' are deployed, pulling the sash and the frame tightly together whilst in the centre 2 opposing 'mushroom cams' lock. This gives serious strength and rigidity.

● Hook locks

Hook locks deliver the ultimate in anti-intruder security. Hook locks are fitted towards the top and bottom, along the locking edge of the door. They also incorporate anti-lift bolts and work in unison with a soft closing handle and centre dead-lock.

● Secondary deadlock (composite doors only)

Optional dead-lock is available and is operated by a simple thumb turn on the inside allowing the door to be secured without the need lift the handle and lock the door. It also has the secondary benefit of restricting young children being able to depress the internal handle and open the door.

● Entry guard (uPVC doors only)

Optional integral door chain which is engaged with a simple thumb turn and then restricts the door opening but is able to be disengaged normally in the event of an emergency.
